PROFESSIONAL SUMMARY

Third-year Computer Science Engineering student specializing in Artificial Intelligence and Machine Learning, with foundational experience in full-stack development and a growing interest in machine learning algorithms and model development. Eager to apply technical skills to real-world projects, strengthen problem-solving abilities, and explore internship and career opportunities in AI/ML and software development.

TECHNICAL SKILLS

Programming Languages : Python, SQL, Java
AI/ML : Supervised Learning, Decision Trees, Random Forest, XGBoost, Model Evaluation
Data science : Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn
Tools: GitHub, VS code, Jupyter Notebook

PROFESSIONAL EXPERIENCE

CODEC TECHNOLOGIES July(2025) – August(2025)

- Completed a one-month internship as an Artificial Intelligence Intern at Codec Technologies Pvt. Ltd., gaining exposure to AI concepts and industry-oriented learning.
- Participated in assigned project and training tasks to strengthen technical knowledge and develop practical skills in Artificial Intelligence.

EDUCATION

B.E. Artificial Intelligence and Machine Learning Rajalakshmi Institute Of Technology, Chennai 2024 – 2028 | CGPA:7.76

ACADEMIC PROJECTS

ShopEasy Ecommerce Website

- Developed ShopEasy, a full-stack e-commerce website using HTML, CSS, JavaScript, PHP, and MySQL, featuring user registration, login, product browsing, and shopping cart management.
- Implemented checkout and order management functionality, along with an admin dashboard for product, category, and order management.

Online Parking Reservation System

- Developed an Object-Oriented Programming (OOP) mini-project to apply core programming concepts such as classes, objects, encapsulation, inheritance, and polymorphism.
- Implemented modular, reusable code to strengthen programming fundamentals, logical thinking, and problem-solving skills.

Python-Based CSS Parser and AI Question-Answering Agent

- Developed a Python-based CSS parser to process stylesheets, handle edge cases, and generate stylesheet summaries, along with an AI question-answering agent using a local JSON knowledge base and tool execution traces.
- Implemented evidence-based responses to reduce hallucinations and 22 automated unit tests to validate both projects, using Python 3's standard library without external dependencies.
